TITLE : PIPE COUPLING

ABSTRACT : PURPOSE: To prevent the removal of a pipe securely without using a metallic fastening ring.

CONSTITUTION: A coupling main body to connect both fluid pipes 1 and 2 each other is formed of a glass fiber reinforced plastic, and by making the inner surfaces of fastening rings 4a and 4b provided outer side of the outer peripheral surface of the other side fluid pipe 2, in an uneven surface of a fiber reinforced plastic whose strength and the hardness are higher than the coupling main body 4 and the surface of the fluid pipe 2, a strong removal preventive function of both fluid pipes 1 and 2 each other by a removal preventive part 8 can be obtained without using a metallic fastening ring.
